

# Action Plan 2025 - 2026

|     | Action                                                                                                                                                                                                  |
|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A1  | Creating an effective Communications Strategy and implementing it's objectives across NESBiP's communications channels.                                                                                 |
| A2  | Raising awareness and promote the value of biodiversity to the communities and other Key Stakeholders throughout north east Scotland.                                                                   |
| A3  | To maintain working relationships with local organisations and initiatives related to the Strategic Delivery Plan process.                                                                              |
| A4  | To support the Local Authorities and the network of biodiversity partnerships across Scotland                                                                                                           |
| A5  | To assist and support NESBiP partners with action related to the Scottish Biodiversity Strategy and Nature Conservation Act (Scotland) 2004                                                             |
| A6  | To support partners in implementation of biodiversity actions and provide representation for external interest groups to provide biodiversity advice and support (for example Moray CAN and NESCAN Hub) |
| A7  | To provide secretariat to the NESBiP Advisory and Management Groups.                                                                                                                                    |
| A8  | Support communities in delivery of wildflower seed collection workshops and providing resources on how to grow                                                                                          |
| A9  | Support communities in delivery of biodiversity projects identified during the annual spring seminar                                                                                                    |
| A10 | Support and collaborate with NESBReC to help promote citizen science recording                                                                                                                          |
| A11 | Continue to promote the Camera Trap project with schools, community groups and members of the public                                                                                                    |

# Action Plan 2025-2026 (cont.)

|     | Action                                                                                                                                                                                                                                     |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A12 | Assess what would be required to revitalise the “Pooling our Ponds” initiative                                                                                                                                                             |
| A13 | Facilitate sharing best practice across Local Authorities planning and Landscape Services departments, Countryside Rangers, Greenspace Offices and Itihica Engery Employees. Provide training events in each Local Authority as requested. |
| A14 | Update NESBiP website when needed and continue promoting partners communicate their biodiversity outputs.                                                                                                                                  |
| A15 | Support the NESBiP Awareness and Involvement group on evolving the best way to communicate and work together                                                                                                                               |
| A16 | Support and collaborate with the Aberdeen City Council Nature Awareness Campaign                                                                                                                                                           |
| A17 | Support and collaborate with Nature Networks and B-Lines                                                                                                                                                                                   |
| A18 | Support on Denburn Project                                                                                                                                                                                                                 |
| A19 | Facilitate sharing best practices across Farm Clusters and provide trainings when needed.                                                                                                                                                  |
| A20 | Ongoing support with biodiversity on The James Hutton Institute grounds                                                                                                                                                                    |
| A21 | Ongoing support with The James Hutton Institute outdoor classroom in collaboration with the SEGS department                                                                                                                                |
| A22 | Support Itihica Energy's biodiversity goals and provide corporate volunteering opportunities when needed.                                                                                                                                  |
| A23 | To investigate options of NESBiP creating a LinkedIn profile                                                                                                                                                                               |
